

O. Mogire Laban

Senior Frontend Developer

laban405@gmail.com | +254797313732 | <https://github.com/laband405> | <https://www.linkedin.com/in/laband405>

Professional Summary

Senior Frontend Developer with 6+ years of experience building scalable, maintainable frontend applications. Experienced in modern frontend architectural designs, optimizing user experiences and collaborating across teams at scale. Passionate about clean code, modern UI frameworks, and advancing web accessibility. Proven track record leading cross-functional teams and mentoring junior developers while driving innovation in UI/UX design and software development practices.

Skills

Programming Languages: JavaScript, Typescript, Dart, NoSQL.

Development Tools: Git, Docker, NX, Webpack, Jest/Enzyme, Cypress, JIRA, Nginx.

Frameworks & Libraries: Angular, Ionic, Capacitor, React, React Native, Flutter, Next Js, Node.js.

User Interface Tools: HTML, CSS, SASS, Shadcn, Bootstrap, Material, AntD, Tailwind CSS.

Operating Systems & Platforms: Linux, macOS, Windows, GCP, Azure, Digital Ocean, Vercel, AWS.

Professional Experience

Front End Engineer

Kamsware

November 2023 - Present

- Partnering with offshore Tech Lead to deliver 150+ features across 3 projects with 95% on-time success through cross-timezone coordination, sprint planning, and seamless API integration.
- Reduced app loading times by 50% and API integration effort by 30% by architecting reusable Angular OData query modules with intelligent caching strategy for large-scale enterprise application.
- Updated NX build tools and optimized CI/CD workflows for 3 frontend apps, accelerating delivery of updates by 50%.
- Designed and implemented a scalable hardware-communication architecture in Angular/Ionic leveraging WebSerial, WebUSB, BLE, and WiFi APIs to automate provisioning and diagnostics for 5,000+ IoT devices and improve onboarding efficiency by 96%.
- Mentored 3 junior developers on Angular best practices, TypeScript, and component design patterns, accelerating team delivery speed by 50%, 2 of whom earned promotions within 12 months.
- Led frontend architecture and development of enterprise IoT management portal managing 5+ sites and 100+ devices with real-time notifications, device management, and monitoring dashboards for 1,000+ users.

Front End Engineer

Kyosk Digital Services Ltd

July 2022 - November 2023

- Implemented a design system aimed at standardizing web and mobile app interfaces, increasing component reusability, resulting in a 40% increase in user satisfaction.
- Migrated REST APIs to GraphQL, reducing app response times by 45% and enabling 3x higher trip delivery volumes.
- Configured Progressive Web Apps with bundle compression techniques and caching mechanisms, lowering mobile data usage cost by 70%.
- Fixed 200+ bugs reported by QA, improving overall software quality.

- Determined root cause for most complex software issues and develop practical efficient permanent technical solutions increasing order deliveries by 50%
- Produced technical documentation that decreased onboarding time for new hires by 2 weeks.
- Successfully migrated legacy monolith frontend to micro-frontend architecture leveraging Single-SPA with Angular, implementing shared component libraries and independent CI/CD pipelines that improved scalability, deployment independence, and boosted developer velocity by 50%.

Front End Engineer

Innovex Solutions

January 2022 - July 2022

- Architected enterprise spare parts sourcing system for 60+ insurers and garages using Angular 16 with TypeScript and NgRx, reducing accident resolution periods by 78%.
- Developed component library of 20+ reusable Angular modules achieving 30% code reuse across the platform, reducing feature development time by 50%
- Enhanced user authentication processes, improving security and user trust by 30%.
- Implemented typescript best practices that increased code maintainability and readability, raising team productivity by 50%
- Implemented automated visual regression testing, cutting UI bugs in production by 70%.

Front End Engineer | UI/UX Architect

Data Integrated Limited

November 2020 – December 2021

- Led end-to-end redesign of travel ticket booking platform by conducting user interviews and usability testing that increased bookings by 50%, reduced trip booking time by 30%.
- Led frontend architecture for the NTSA Intelligent Transport MVP, building a React UI for tracking 500,000+ commercial vehicles, designing 40+ Figma screens, and integrating four microservices APIs to help drive a 30 percent compliance improvement.
- Established comprehensive frontend coding standards for 5-engineer team using JavaScript ES6+, ESLint, Prettier, and Git pre-commit hooks, reducing code review time by 40%, cutting technical debt by 60%, and decreasing production bugs to 1-2 minor issues per sprint through automated quality gates.
- Conducted UX and accessibility audits across 3 mobile and web applications, identifying 45+ usability issues and violations, implementing fixes that improved task completion rate by 25%, reduced bounce rate by 20%.

Software Developer | UI/UX Architect

Ciphercom Limited

January 2020 – August 2020

- Developed frontend web and mobile apps for Sacco and Loan Management SaaS serving 20+ organizations, managing KES200M+ loan portfolio and 5,000+ member accounts with loan applications, disbursements, and repayment tracking via RESTful APIs.
- Created 20+ technical documentation artifacts (user flows, architecture guides, coding standards) in Figma, reducing developer onboarding from 6 weeks to 2 weeks
- Led bi-weekly code reviews and sprint retrospectives for 4-engineer team, increasing sprint velocity by 50% and accelerating release cycles to weekly.

Education

B.Sc. Computer Science

2014 - 2018

Jomo Kenyatta University of Agriculture and Technology
