Professional Summary

Senior Frontend Engineer with 6+ years of experience building scalable, high performance web and mobile applications using Angular, React and Typescript.

Proven track record of modernizing legacy systems, improving developer productivity, and delivering high-performance, accessible products serving thousands of users. Comfortable owning frontend architecture decisions across application design, state management, design systems, component libraries, CI/CD, and API-driven development.

Experienced in leveraging AI-powered tools to accelerate delivery and improve code quality, with expertise in LLM integration, RAG, workflow automation, and agentic UI development.

Technical Skills

Languages: TypeScript, JavaScript, HTML5, Dart

Frameworks: Angular, React.js, Next.js, Ionic, Flutter

Styling: Tailwind CSS, CSS3, SASS, Bootstrap, Material UI, Shadcn, AntD

State & Data: Redux Toolkit, React Query, NgRx, Context API, REST APIs, GraphQL, OData

Testing: Storybook, Jest, Cypress, Visual Regression Testing, Browser Compatibility

Design: Figma handoffs, Responsive Design, WCAG 2.1 AA Accessibility

Tools & DevOps: Git, GitHub Actions, Bitbucket, Docker, NX, CI/CD, Vercel, GCP, Webpack, Vite

Backend: Node.js, Express.js, PostgreSQL, MongoDB, Firebase

AI & Productivity: OpenAI Codex, Claude Code, RAG, LangChain, AI Agents, Workflow Automation

Professional Experience

Senior Frontend Engineer

Kamsware | Nov 2023 – Present

- Led frontend architecture and delivery for an enterprise IoT fire detection platform, mobile monitoring app, and connected-device ecosystem, shipping 150+ features with 95% on-time delivery.
- Architected a centralized identity and access platform with role-based authorization across multiple applications, reducing authentication latency by 45%.
- Built reusable component libraries and design systems that improved UI consistency and accelerated feature delivery across LMS, IoT, and web products by 40%.
- Developed web and mobile integrations for IoT hardware using Bluetooth, USB, serial, and Wi-Fi protocols, enabling automated provisioning of 5,000+ connected devices.
- Delivered AI-powered knowledge discovery solutions using LLMs, RAG, and workflow automation, reducing internal information retrieval time by 80%.

Front End Engineer

Kyosk Digital Services Ltd | July 2022 - November 2023

- Delivered a design system standardizing web and mobile app interfaces, achieving 40% improvement in component reusability across 3 platforms.

- Migrated a legacy monolithic frontend to a microfrontend architecture using Single-SPA, introducing shared component libraries and independent CI/CD pipelines, improving release frequency by 50%.
- Migrated REST APIs to GraphQL architecture, reducing app response times by 45% and enabling 3x higher trip delivery volumes across the platform.
- Optimized Progressive Web Apps with bundle compression and intelligent caching mechanisms, lowering mobile data usage costs by 70% for end users.
- Resolved 200+ critical and high-priority bugs reported by QA team, improving overall software quality and reducing customer-reported issues.
- Created comprehensive technical documentation, decreasing onboarding time for new engineers by 2 weeks and reducing knowledge gaps across the team.

Front End Engineer

Innovex Solutions | January 2022 - July 2022

- Built a vehicle spare parts sourcing system used by 60+ insurers and garages, improving accident resolution time through streamlined workflows.
- Designed and developed component library of 20+ reusable Angular modules achieving 30% code reuse, reducing feature development time by 50% across the platform.
- Implemented automated visual regression testing in the CI/CD pipeline, cutting UI bugs in production by 70% and improving release confidence.

Front End Engineer

Data Integrated Limited | November 2020 – December 2021

- Designed and built end-to-end trip booking platform through user interviews and usability testing, increasing bookings by 50% and reducing booking time by 30%.
- Architected a React vehicle tracking platform for NTSA Intelligent Transport serving 500,000+ vehicles, improving compliance tracking by 30%.
- Established frontend coding standards (ESLint, Prettier, Git hooks) for 5-engineer team, reducing code review time by 40% and cutting technical debt by 60%.
- Conducted UX and accessibility audits across 3 mobile and web applications, identifying 45+ usability issues and violations. Implemented fixes that improved task completion rate by 25%.

Software Developer | UI/UX Architect

Ciphercom Limited | January 2020 – August 2020

- Built frontend for React based Sacco and Loan Management SaaS platform serving 20+ organizations, managing KES200M+ in active loans and 5,000+ member accounts.
- Created 20+ technical documentation artifacts reducing developer onboarding from 6 weeks to 2 weeks.
- Managed bi-weekly code reviews and sprint retrospectives for 4-engineer team, amplifying sprint velocity by 50% and accelerating release cycles to weekly deployments.

Education

B.Sc. Computer Science

Jomo Kenyatta University of Agriculture and Technology | 2014 - 2018

Selected Project

HR Knowledge Assistant (RAG System)

Built a production-grade RAG platform for natural language search over internal HR knowledge bases, including document ingestion (PDF processing, chunking, embeddings, vector storage), semantic retrieval, and GPT-powered response generation.
